

Specifications

Description

Sous Vide is a cooking method in which the food is vacuum sealed in a plastic pouch and then cooked in a water bath at a pre-set temperature. This provides more control with consistent results every time. Adcraft's Sous Vide immersion circulator will help you achieve that perfect texture, taste and tenderness for all meats, seafood and vegetables. Cook food to the desired temperature safely and never overcook your food again. Our Sous Vide immersion circulator features a digital LED temperature display that accurately gauges water temperature to within 0.1 degree. Cooking different types of food is easy with its different pump speed settings. This unit allows you to program up to three cooking settings at a time. This unit is CE Certified and backed by Adcraft's 1 year replace or repair warranty.

Construction

- Stainless steel housing
- Easy to read digital LED temperature display

Operation

- Temperature stability to 0.1°F (0.06°C) for precise, consistent results every time
- Three programmable settings for ease of use
- Two pump speeds for controlled cooking
- Accurate LED temperature (Fahrenheit and Celsius) display for precise cooking

Electrical

- 120V, 1200W, 10 Amps
- 6' power cord with NEMA 5-15 plug
